## Screening Form

Proposal	
Title of Proposal	Local Outcomes Improvement Plan
Does this relate to a budget setting Proposal	false
Directorate and Service	Connected Communities
Amount of saving if appropriate (£)	[Amount of saving if appropriate (£)]
Budget reference number	[Budget Reference Number]
ECRIA Lead Officer	Morna Rae
ECRIA Contributors	Jacqueline Greenlees, Andrew Hale
Date Initiated	10/11/2021

What are the main aims of the proposal?

New strategic plan for North Ayrshire Community Planning Partnership, showing how our local public services work together with communities, third sector organisations and businesses to plan and deliver services that will improve long term outcomes and tackle inequalities.

What is the rationale for the proposal? Please highlight any data, research, officer knowledge or other relevant evidence used to consider any potential impacts on protected groups?

Plan is required under the Community Empowerment (Scotland) Act 2015. This states that:

-this should set out agreed partnership outcomes to be achieved

- these local outcomes must be consistent with the national outcomes

- they should focus on reducing inequalities of outcome which result from socio-economic disadvantage - it should be supported by community consultation

In devising the plan the Community Planning Partnership has drawn from the following sources:

1. Community consultation - a public engagement exercise on the new LOIP, consultation with the North Ayrshire Peoples Panel, public engagement by HSCP on new strategic plan, public consultation on locality priorities

2. Statistical profiles of North Ayrshire - a strategic needs assessment by Public Health Scotland, NAC economic briefings, Community Planning Outcomes Profile

3. Research on the approaches of other Community Planning Partnerships

4. Mapping of the wider strategic framework, national requirements and influencing factors

5. Understanding of the available resource to the Community Planning Partnership, our scope of influence and where we can best add value.

Addressing inequalities has been a key focus in the development of the plan. This includes an understanding of what are the inequalities in North Ayrshire and a "weighing up" of which of these should be priorities in the plan using an evidenced based approach.

This means that the plan will have a positive impact on some protected groups.

### Screening Questions

Does the proposal affect service users either positively or negatively, employees or the wider community and specifically to services that are known to being important to particular protected groups	true
Does the proposal have any relevance for Human and/or Children's Rights	true
Considering 'The Fairer Scotland Duty' - Does the proposal have any negative (or	true
potential) positive socio-economic impacts	
Consider 'Island Proofing', Are there any special considerations for the Island	true
Communities within North Ayrshire	
•	
Is it a major proposal, significantly affecting how services are delivered or how other	true
organisations operate	
Does it relate to an area where there are known inequalities or has significant potential	true
for reducing inequalities or improving outcomes	
······································	

Please provide a brief overview of any areas ticked 'yes' from question 4. (These should be considered in more detail in a full assessment)

It is a key strategic partnership plan for North Ayrshire with a focus on addressing inequalities.

Socio-Economic Impact Assessment

Socio-economic impact

true

Evidence

The focus of the plan is to address local inequalities relating to socio-economic disadvantage, through a variety of outcomes as outlined above.

**Further Comments** 

It will have a positive impact on socio-economic inequalities.

Island Communities Impact Assessment Specific Impacts for Island communities

true

### Impact

There are outcomes in the plan that will have a positive impact on issues within our island communities, particularly in regard to accessibility. These include:

• Health improvement activities and support are accessible.

• People can easily access local facilities and support through clear coordination and signposting. Evidence

We know from the consultation on our Islands Plans that access to services can be a challenge.

**Further Comments** 

Links to the Islands Plans are highlighted.

Considering all the areas within the impact assessment process, are there any gaps in the evidence

Once the Local Outcomes Improvement Plan is agreed the next stage will be to develop the action plan and performance framework. We will seek additional evidence to influence how we deliver on the agreed outcomes, this will include community consultation. This will increase our understanding of potential impacts.

Have any cross-cutting impacts been identified from other Council Services or Partner Agencies (multiple discrimination or accumulated effects of multiple proposals on protected groups)

None identified at present. As the Local Outcomes Improvement Plan is a binding plan across partner signatory organisations over time individual partner plans will increasingly align with this, and there will therefore be an accumulated positive impact on the groups outlined above.

### 'Three key needs' of the Equality Duty

Which aspects of the policy eliminate unlawful discrimination, harassment and victimisation None

Which aspects of the policy/proposal advance equality of opportunity between people which share a relevant protected characteristic and those who do not

With its approach of addressing areas of inequality in North Ayrshire it should promote equality of opportunity across many of the protected characteristics.

Which aspects of the policy foster good relations between people who share a protected characteristic and those who do not

The following outcome will help foster good relations - We have strong relationships within our communities to reduce social isolation and loneliness.

Has there been any consultation on the (budget) proposal with any protected characteristic groups, communities in general or other services or partner organisations

In devising the plan the Community Planning Partnership has drawn from community consultation - a public engagement exercise on the new LOIP, consultation with the North Ayrshire Peoples Panel, public engagement by HSCP on new strategic plan, and public consultation on locality priorities. There has been extensive partner engagement in its development.

Once the Local Outcomes Improvement Plan is agreed the next stage will be to develop the action plan and performance framework. We will seek additional evidence to influence how we deliver on the agreed outcomes, this will include community consultation. This will increase our understanding of potential

impacts.

Describe how you will monitor the impact of this policy/proposal on the protected groups (if relevant) moving forward

In the implementation of this plan we will work closely with our communities including groups aligned to the protected characteristics.

Details of the Outcome

No major alterations

Summary or key points arising from the Impact Assessment and the Outcome of the Assessment process (how will you take any actions forward)

The focus for throughout the development of this plan has been to identify inequalities, and agree which of these would most benefit from a partnership approach to reduce them.
